Subject: Progress Report On Contract No. LW-473
Top Level Technical Support for Customer "A"

Dear Dan:

Enclosed is our Invoice No. 12827 for reimbursement for service under Contract No. LW-473.

During the month of August the technical support activity was principally directed in the field. [redacted] departed for B Detachment on 7 August and continued through the month. The Trackers and to a lesser extent the Hand Controls and Driftsights were inspected, adjusted, and retrofitted, with suitable instruction of the detachment personnel. [redacted] visited B and C detachments during the period 10 August through 30 August. His activity is covered in his trip report for this visit.

Other field activities involved technical consultations at Headquarters on the part of [redacted] on 4 August, and by Messrs. [redacted] on 29 August.

In addition, there was a total of 25 hours of in-plant activity by [redacted] and 2 hours by [redacted]. This involved the investigation of a variety of technical problems being experienced by special equipment support people in the field. In all cases the sought-after solution was a permanent fix which was feasible to accomplish in the field, and which would result in a higher level of equipment performance. Also included in this in-plant activity was a small amount of technical coordination for the Tracker red-dot tests and the related problem of the Tracker horizon filter.

I hope that this will cover your requirement for the technical report called for under the contract, and monthly progress reports will be submitted at the time we submit all future invoices. Should you have any questions or require further information, please let me know.
